

IMO MODEL TRAINING COURSE - Level 2

SIMO 2/15 | 18-21 October 2010 | Goa, India

Course objectives

To provide Marine Incident Command Team members, On-Scene Commanders and Tactical Supervisors with the skills and knowledge necessary to effectively manage field response operations and form part of the Incident Command System.

Closing date for course registration: 8th October 2010

The use of the Incident Management System is becoming more prevalent in the oil and gas industry as a flexible means of coping with an emergency.

Topics covered

- ◆ Causes and fates of oil spills
- ◆ Contingency planning
- ◆ Environmental impacts
- ◆ Incident Command System (ICS)
- ◆ Oil spill management
- ◆ Media issues
- ◆ Response options
- ◆ Waste management
- ◆ Site safety
- ◆ Termination of a response
- ◆ Liabilities, compensation and insurance
- ◆ Understanding the importance of having an effective oil spill contingency plan (OSCP)

Who should attend?

- ◆ Staff fulfilling roles within the Incident Command Team including the On-Scene Commander
- ◆ Staff in charge of shoreline, offshore and aerial operations

You will be able to:

- ◆ Co-ordinate an effective oil spill response effort
- ◆ Develop a suitable Incident Action Plan
- ◆ Monitor and implement safety and security procedures
- ◆ Understand response options and waste issues
- ◆ Identify and prioritise resources at risk
- ◆ Understand the need to handle the public and media issues
- ◆ Understand operational limitations and issues
- ◆ Utilise an Oil Spill Contingency Plan (OSCP)
- ◆ Fulfill an active role in any Incident Command Team
