

# IMO Level 3 OIL SPILL MANAGEMENT

SMAN 10 | 26 - 28 April 2010 | Ho Chi Minh City, Vietnam

## Course objectives

To provide senior managers and government administrators with an overview of oil spill response, preparedness, planning and management issues.

This IMO Level 3 accredited course is available in both three-day and four-day durations. Both options feature the same training elements, with an equipment deployment exercise included for the four-day programme.

## Topics covered

- ◆ Causes and fates of spills
- ◆ Contingency planning
- ◆ Managing the media
- ◆ International co-operation
- ◆ Liability, compensation and insurance
- ◆ Response policy and planning
- ◆ Health and safety management
- ◆ Response strategies and limitations
- ◆ Termination of response
- ◆ Environmental impacts
- ◆ Spill management systems and techniques

## Who should attend?

- ◆ Managers and administrators who have responsibility for ensuring effective command and control of an oil spill response effort
- ◆ Senior officials from government agencies involved in oil spill response (environment, coast guard, navy, army, finance, etc.)
- ◆ Senior managers and administrators who have overall responsibility for crisis management in oil spill response
- ◆ Staff who would be responsible for liaising with external agencies at a corporate level

## You will be able to:

- ◆ Understand what constitutes an effective response organisation
- ◆ Understand the consequences of oil spills
- ◆ Interpret key issues in relation to liability for claims and compensation
- ◆ Understand the operational limitations of response strategies employed during oil spill incidents
- ◆ Understand the roles and interfaces between Government agencies and the industry
- ◆ Understand the legal framework and international conventions
- ◆ Identify response options and resource requirements
- ◆ Terminate a response
- ◆ Know the importance of an oil spill contingency plan
- ◆ Protect your people in an oil spill response
- ◆ Perform the role of Incident Commander

## If attending the 4-day course:

- ◆ Have firsthand experience of equipment deployment
- ◆ Experience a press conference
