

# IMO Level 3 OIL SPILL MANAGEMENT

SMAN 09 | 22 - 25 February 2010 | Singapore

## Course objectives

To provide senior managers and government administrators with an overview of oil spill response, preparedness, planning and management issues.

**Closing date for course registration: 10<sup>th</sup> February 2010**

This IMO Level 3 accredited course is available in both three-day and four-day durations. Both options feature the same training elements, with an equipment deployment exercise included for the four-day programme.

### Topics covered

- Causes and fates of spills
- Contingency planning
- Managing the media
- International co-operation
- Liability, compensation and insurance
- Response policy and planning
- Health and safety management
- Response strategies and limitations
- Termination of response
- Environmental impacts
- Spill management systems and techniques

### Who should attend?

- Managers and administrators who have responsibility for ensuring effective command and control of an oil spill response effort
- Senior officials from government agencies involved in oil spill response (environment, coast guard, navy, army, finance, etc.)
- Senior managers and administrators who have overall responsibility for crisis management in oil spill response
- Staff who would be responsible for liaising with external agencies at a corporate level

### You will be able to:

- Understand what constitutes an effective response organisation
- Understand the consequences of oil spills
- Interpret key issues in relation to liability for claims and compensation
- Understand the operational limitations of response strategies employed during oil spill incidents
- Understand the roles and interfaces between Government agencies and the industry
- Understand the legal framework and international conventions
- Identify response options and resource requirements
- Terminate a response
- Know the importance of an oil spill contingency plan
- Protect your people in an oil spill response
- Perform the role of Incident Commander

### If attending the 4-day course:

- Have firsthand experience of equipment deployment
- Experience a press conference
