

Environmental Advisors Field Course, 25-27 August 2009

To provide delegates with the knowledge to mitigate the effects of oil spills on the environment and critically evaluate and compose their own response strategies to ensure achievement of a net environmental benefit.

Location

Wales, UK

Member

£920

Non-Member

£1,280

Who should attend?

- ◆ Environmental advisors and all other individuals who have an interest or involvement in oil spill issues and environmental considerations
- ◆ Oil company representatives responsible for HSE matters, local authorities and stakeholder groups with responsibility for the protection of environmental resources
- ◆ Those responsible for contingency planning and directing the response to marine oil spills, academic institutions and other organisations that may be requested to provide expert advice in the event of an oil spill

Topics covered

- ◆ Oil properties and the fate of spilled oil
- ◆ Contingency planning
- ◆ Sensitivity mapping
- ◆ Wildlife rehabilitation
- ◆ Spill Response techniques
- ◆ Environmental effects
- ◆ NEBA
- ◆ Legal regimes
- ◆ Postspill monitoring
- ◆ Sampling strategies
- ◆ Environmental restoration
- ◆ Case studies

In association with:

CALM

You will be able to...

- ◆ Demonstrate awareness of marine and coastal ecosystems
- ◆ Describe the advantages, disadvantages and limitation of response options
- ◆ Provide strategic advice on the selection of response strategies for a given environment
- ◆ Explain available compensation levels
- ◆ Understand the importance of contingency planning
- ◆ Explain the effects of oil on fisheries, sea birds and mammals and best practice for rehabilitation
- ◆ Describe the objectives for monitoring and knowledge of the techniques available
