COVID-19 Update (11th September 2020)

Dear Member/Shareholder Rep,

As reported previously, we are seeing a continued improvement of the freight and passenger air transport markets. OSRL continue to maintain a close watch on developments and we expect there to be a high demand for, and consequent reduced availability of, freight aircraft when vaccines are approved and go into full production. This will have less impact on the Antonov markets as they cannot offer climate-controlled options as easily as the B747 platforms.

Following on with our Country Plan developments, this week we have published the Republic of Congo; bringing our total to 57 Country Plans. We have updated 11 plans namely; Kuwait, Qatar, Saudi Arabia, Atlantic Canada, Trinidad and Tobago, New Zealand, Philippines, Bahrain, Russia, Oman, United Arab Emirates, and the Mauritius country plan is under development.

At our Southampton base, today marks the end to our collaboration with FareShare. This collaboration has been a great opportunity to help our local community and provide vital food supplies to people struggling during the COVID 19 pandemic.

We recently released a blog in which Adriana Handszer, one of our consultants talks about working in complex regulatory environments.

*"Recently I supported Noble Colombia in the development and socialisation of several critical documents for their first offshore exploration well in the country." [Click here](#) to read more.*

We also delivered some face to face OPEP 3 training to one of our members in Aberdeen. Lucy Bly, OSRL Business Transformation Manager in Aberdeen shares this experience to demonstrate how face to face training can be achieved safely in a COVID-19 world. Read more on our blog: [it safe to return to return to face to face training?](#)

We continue to release new dates for our remote training courses, these can be viewed [here](#).

We remain just a phone call away, ready to virtually support you and your operations. If you have any questions, please email [CMT@oilspillresponse.com](mailto:CMT@oilspillresponse.com) or contact our Duty Managers.

Yours sincerely,

Robert Limb

Chief Executive

Oil Spill Response Limited
