

UKCS Corporate Manager (OPEP 2)

OPEP | 2

Know your SOSREP and OCU's from your OPEP's to give you the awareness you need as a corporate decision maker for oil spill response activities

Are you a corporate decision maker in your company and do you know your SOSREP and OCU's from your OPEP's? If not, then this course will give you the awareness that you need in that role for priority setting, reporting requirements and oil spill response activities.

Course Programme

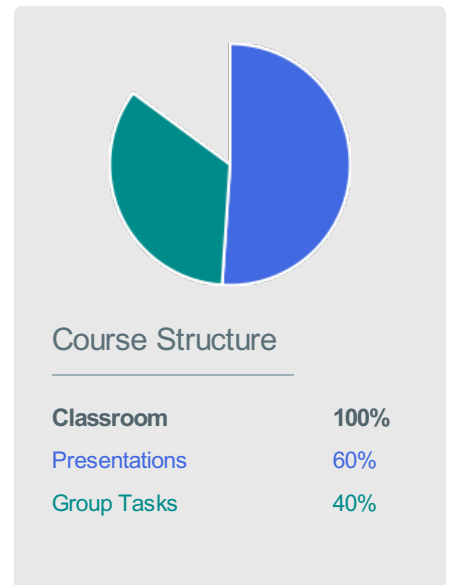

- Legislation and agreements
- Causes and fates
- Reporting procedures required under OPRC and MARPOL, proven by the use of the PON 1 form
- Fate and effects of offshore oil spills
- Oil Pollution Emergency Plans (OPEP's)
- Response strategies, limitations and considerations
- The decision-making processes used to manage a spill incident
- Identification of the reasons for activation of the response
- Roles and responsibilities of stakeholders and how they interact
- Termination of a spill

What will I learn?

As an essential course for operating in the UKCS, you will learn about the specific legislation and roles of relevant government agencies in addition to the required Oil Spill Emergency Plans and specific response strategies.

This course will give you the knowledge and understanding in the following areas:

- Awareness of oil spill response issues specific to the UKCS, including statutory requirements and response strategies.
- Requirements placed upon an operator
- Understand the role of, and interaction with, relevant government agencies during an oil spill including the Secretary of State's Representative (SOSREP)
- Oil Spill Emergency Plans (OPEP), oil behaviour in the environment, response strategies and spill termination.

Excellent balance of material and activities to reinforce concepts."
